

Higher Education

IP Pathways provides schools with new technology resources that keep pace with the innovation taking place in higher education. Look to us to not only save you money, but to lighten your staff's workload as well. We minimize, even eliminate, downtime while protecting your data and ensuring business continuity. IP Pathways allows you to focus on delivering an elevated student experience while we focus on your IT.

- IT Consulting & Strategy
- IT Infrastructure Solution Design
- IT Hardware & Software Procurement
- Wired & Wireless Networking Infrastructure
- Virtual Desktops
- Disaster Recovery & Business Continuity Planning
- Managed & Co-Managed IT Services
- Project Based Professional Services
- 24x7x365 IT Support
- Offsite Backup

Reduce Cost

Educational institutions are always under budget constraints and must manage capital and operating expenses wisely. Let us help you keep costs under control while maintaining the highest levels of availability, security and privacy.

Protect Students

Student safety is critical. We architect and implement information security solutions to protect students as they work online, plus use advanced solutions such as integrated video security, data storage and access controls to maintain a safe campus environment.

Enable Mobility

We help you reclaim your labs and convert them back to revenue-producing classrooms. We virtualize the desktops and deliver applications and data to any device, anywhere, at any time. This frees your IT staff from being tied up with costly lab support and management, and embraces technology that students prefer.

Provide a Connected Campus

Technology is a key competitive advantage when students shop for schools. Students expect to be able to use a myriad of devices and have access to reliable, high-speed wireless across your entire campus. We ensure you're positioned to meet their evolving requirements.
