

## Unified Security Platform

The IP Pathways Unified Security Platform delivers fully-managed security platform services, including equipment, configuration, implementation, expert support and monitoring to prevent Internet-borne attacks.

Our Unified Security Platform combines:

- Managed or co-managed Security Information and Event Management (SIEM) services enable you to maximize the value from a SIEM and enhance your security monitoring capabilities, while retaining flexibility.
- The IP Pathways vSOC is a simple and affordable way for organizations with limited security staff expertise or budget to address compliance and threat management.

## PROFESSIONAL SERVICES
